

Essentials 1.8m Acrylic Pedestal

Simple and reliable solution

Essentials 1.8m acrylic detection pedestal is an affordable, simple and reliable loss prevention solution embodied in a classic design. The pedestal is made of high-quality and durable acrylic panel, and the simple design makes the store look elegant.

The 1.8m (6ft) protection width meets most retail application scenarios.

Integrated Design, No additional purchase of EAS Controller required, All-in-one design means installation, debugging and maintenance is simplified, and fast.

Internal Algorithm that allows compatibility with similar products of other brands, while greatly improving the detection performance.

Benefits

- The protection width between the two pedestals reaches up to 1.8m (about 6ft), making it suitable for a variety of use cases.
- New algorithms ensure reliable detection efficiency and prevent asset loss
- Elegant design ensures esthetics of store entrance is not compromised
- Integrated audio and visual alarm provides instant alarming notifications to store assistants

Product Code

ZA1155

Specifications

Antenna

Height.....	158.7cm
Width.....	43.0cm
Depth (w/ base covers)13.0cm
Weight (Primary)	18.5kg
Weight (Secondary)	15.5kg

Environmental Constraints

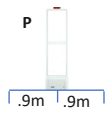

Ambient Temperature 0°~ 50°C
Relative Humidity 0 - 90% non-condensing

Electrical

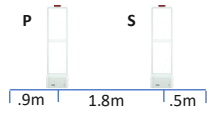

Power Supply	...100-120/180-245VAC 50-60Hz
Fuse.....	2A / 250 VAC slo-blow
Current.....	250mA
Input Power (Max.)	55W
Transmit Frequency58kHz
Burst Duration.....	1.8ms
Burst Frequency.....	50Hz / 60Hz
Alarm Duration.....	3S / 5S
Volume (Max.)	95dB(A)/10cm

Configurations

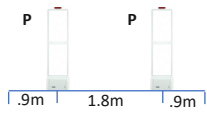

Single

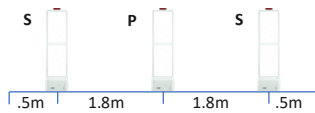

Dual

Dual

Split

Declarations
